

# Index of Activities of Digital Living (ADigL)

*By: Laura Bell, SafeStack Limited, New Zealand*

**WHY:** Digital tools and technologies are now a key enabler and vehicle for societal engagement. By understanding the level of digital independence held by an individual, we can enable them to operate safely in this space and cater our security tools, advice, education and processes to their specific requirements.

**TARGET POPULATION:** The instrument is used effectively among all community members but particularly those outside of traditional technical communities. The tool is most useful when baseline measurements are taken when the individual is well and compared to periodic or subsequent measures.

**HOW TO INTERPRET THE SCORE** Digital independence is measured on a scale from 'Fully Independent' to 'Fully Dependent'.

SCORES	ASSESSMENT
16	Fully Independent
8	Supported
0	Fully Dependent

## Index of Instrumental Activities of Digital Living

		INDEPENDENCE	SUPPORTED	DEPENDENCE
		<b>NO</b> supervision, direction or personal assistance	<b>WITH</b> supervision, direction, personal assistance	<b>RELIANT</b> on a proxy or assistant acting on their behalf
<b>ACTIVITIES</b>	<b>POINTS</b>	2 POINTS	1 POINT	0 POINTS
SHOPPING		Can use online stores to purchase goods and services. Can identify and select between different sources of goods and services. Can change between vendors as requirements change.
